OEL 929-64

21 September 1964

MEMORANDUM FOR: Chief, Air Systems Division

SUBJECT : Readout Computer for [redacted] 25X1A

On Friday 18 September in discussions with [redacted] it 25X1A
developed that the 1004 computer is anticipated shortly at [redacted]. 25X1A
Norm is worrying about getting enough work to do on this machine.
I think it would be desirable to determine whether or not [redacted] readout
couldn't be done on that equipment rather than requiring a new DPD-5.
Please let me have your views on this.
